

Memory Screening

Friday, September 25, 2015

825 Clark Street, Fairplay

Park County Senior Coalition is sponsoring a day of memory screening for Park County residents 60 years of age or older. Memory screening will be provided in Fairplay by the CU Aging Center of Colorado Springs on September 25th.

The test takes 15-30 minutes. Students from the University of Colorado- Colorado Springs psychology graduate program give the tests, but the results are reviewed by the center's licensed psychologists. The test doesn't measure intelligence. The screening test can tell a person if what they are experiencing is normal for someone their age, or whether there may be a problem. It can also serve as a baseline. Results can be useful to help measure any change over time.

Appointments are limited, so requests will be prioritized.
