WHEREAS, the County, through its Public Works Department, performs road maintenance and road construction activities; and

WHEREAS, the Project Owner (also known as Highline) desires to engage the County to render certain professional services and assistance in connection with their project;

NOW, THEREFORE, for the consideration hereinafter set forth, the receipt and sufficiency of which are hereby acknowledged, the parties hereto agree as follows:

I. SCOPE OF SERVICES

Exhibit A
Project Background & Scope of Work

Project Description:

Atlantic Engineering Group, LLC (AEG) contractor(s) for Highline’s rural broadband initiative will be installing 1 ¼” HDPE spooled duct (qty’s ranging from 1-3 ea.) within Park County (Bailey) chip seal road segments outlined in (Exhibit C- map). The accumulative road segment footage is approximately 37,000 LF. A fiber optic cable will then be placed in the duct (no civil construction required for that operation).

Project Contractor is required to obtain utility installation permit from the County (Park County Public Works) and follow all work zone safety requirements per MUTCD. All inspections will be conducted by Park County Public Works-Right of Way Division.

The alignment of the facility will be within the road surface itself, favoring the opposite side of the road from a paralleling gas line which is generally running in the adjacent R/W outside the road surface.

There will be several road crossings required as well in order to feed subscribers on the opposite side of the road from the main backbone. A flush mount hand hole will be placed on each side of these crossings where slack cable and/or fiber splice enclosures will be placed.

The main production equipment currently utilizes a rubber-tired macro trencher (rock saw) that will excavate the running line to the desired depth of 18” cover (Exhibit D- detail). This will require a saw cut of approximately 24” depth. A locate crew consisting of a hydro Vac will physically identify any utilities that cross the proposed running line (telephone and gas) ahead of the saw to verify their depth. A number of tie-in/handhole crews will follow behind the saw setting hand holes on the sides of the road, and performing road crossings by various means including sawing, trenching and back hoeing.

Scope of work trench rehabilitation: Project Contractor will provide these services

Following the excavation of the chip seal to the proper depth of 18” cover, 1-3 1 ¼” HDPE ducts will be placed in the bottom of the trench. Where conditions allow, a chute mounted behind the saw will allow the pipe(s) to be placed seamlessly as the trenching progresses.

Various equipment will then be used to gradually cover the duct with existing soil with no greater than 4” max aggregate size in 6” “lifts”, then compacted with a narrow vibratory sheep’s foot designed specifically for this application. Additional 6” lifts will be placed and compacted in the same manner until the compacted material reaches within 12” from the top of the pavement.

At this stage, warning tape will be placed on top of the compacted trench to serve as an alert in the event future excavation encroaches on the HDPE facility. The remaining 6” lifts will then be placed and compacted to within 3” of the top of the existing chip seal road surface.

Temporary patch: Project Contractor will provide these services

Temporary patch will utilize a “hot box” heater provided by Park County Public Works to heat clean asphalt millings. These heated millings will then be placed to a depth of 3” in the utility trench cut and will be compacted to be flush with the existing chip seal.

Final restoration: County (Park County Public Works) will provide these services

Park County will provide labor and material to place a final (permanent) chip seal surface to the road surface at a later date determined by Park County at the rate of \$4.12/lf., (equivalent of \$21,753/mile). This may occur anytime from July 1, 2022 through December 31, 2023. Cost of final restoration to be paid directly by Highline to Park County.

Exhibit B
Compensation

Accumulated road segment footage is approximately 37,000 linear feet (LF)

37,000 LF x \$4.12 per foot = \$152,440.00 Total Project Cost

\$ 15,244.00 10% due upon receipt of Notice To Proceed to commence final restoration phase

\$137,196.00 90% due (outstanding balance) upon completion of final restoration phase
